

IN THE SPECIFICATION

Please replace paragraph [0067] beginning on page 33, line 37 and ending on page 34, line 12, with the following rewritten paragraph:

[0067]

(4) Effect of Examples

According to ~~Table 1~~ Table 2, it is found that the transparent sheet No. 8 in which a butyl rubber layer and a polycarbonate layer out of the present invention were used, is excellent in transparency and viscoelasticity, on the other hand, the falling ball height is significantly low, therefore it is inferior in impact resistance. On the contrary, it is found that as for the transparent sheets Nos. 1 to 7 having the transparent flexible composition layers in which the thermoplastic elastomer component (A) mentioned above and the liquid material (B) mentioned above of the present invention are used in combination, all have the total transmittance of more than 90%, and have excellent transparency as well as excellent viscoelasticity, and moreover, the falling ball height are 45 cm or higher, therefore they are excellent in impact resistance.

DISCUSSION OF THE AMENDMENT

The amendments to the specification are to correct minor typographical errors. No new matter has been added by the amendments.
